Health in Europe: what facts rise from a comparison between the different countries?

Common and specific challenges, different approaches and good examples are the main themes that will be discussed during the meeting.

A deep analysis of different health care systems and possible reforms on progress or under development.

The main goal is to bring out relevant information to share with policy makers and analysts for the development of the European health systems.

In particular, the meeting will focus on the knowledge of different approaches to the organization, financing and delivery of health services; describe the process, content and implementation of health care reform programs; highlight challenges and areas that require further analysis; provide useful tools to a deeper understanding of the different health care systems and facilitate the exchange of experiences in the field of reform strategies between policy makers and analysts from different countries.
